

SYSTEM AND METHOD FOR MONITORING AND
CONTROL OF BEVERAGE DISPENSING EQUIPMENT

ABSTRACT OF THE DISCLOSURE

A remote data acquisition and transmission system and method are disclosed. A plurality of application controllers are interfaced with remote beverage
5 dispensing equipment from which operation data is acquired by the application controllers. The application controllers communicate with an application host via a local area network, and the application host can communicate with a network operations center using a wide
10 area network interface.
